

NEW PRODUCT INFORMATION SHEET
Chord Electronics ONE - CD Player

This is the ONE

Product Description

From the same design stable as the world-beating DAC64 and Blu upsampling CD transport, the new 'ONE' integrated player offers exemplary CD replay. 'ONE' forms part of Chord's Choral Series of designer hi-fi - perfect for music lovers with a sense of style.

'ONE' features the same professional die-cast CD mechanism and isolated top-loading arrangement as Chord's flagship Blu CD transport. The latest 24-bit 192kHz devices provide digital-analogue conversion. A fully buffered, true balanced analogue output stage ensures the best possible musical performance.

RCA and XLR balanced analogue outputs, plus BNC SPDIF coaxial digital ensures compatibility with a wide variety of audio systems. 'One' can also be upgraded by adding the DAC64.

ONE in 'Brilliant' finish

Chord Electronics Limited

Product Specification

Frequency Response:	20Hz – 20kHz +/- 0.2dB
Total Harmonic Distortion:	< 0.003% 20Hz to 20 kHz
DAC Architecture:	24-bit 192kHz Delta-Sigma, 128x oversampling
Laser Mechanism:	Philips CD-Pro2M
Signal-noise ratio:	106dB A-weighted
Channel Separation:	100dB @ 1kHz
Analogue Outputs:	2 x RCA-phono single ended, 2 x XLR balanced
Digital Outputs:	1x BNC digital Coaxial SPDIF
Finish Options:	Satin Silver, Satin Black, Brilliant Gold or Silver Chord badge
Mains Power:	50v AC through to 260v AC Auto line adjust
Dimensions (mm):	335 x 105 x 170 (W x H x D)
Weight:	7 Kg
